LIGHT FIXTURES

THE FOLLOWING SUBMITTAL HAS BEEN REVIEWED BY NICKLES ELECTRIC: JTP 2/11/2016

## DESCRIPTION

The SkyRidge™ transforms ambient lighting by perfectly blending a refined modern styling with our breakthrough WaveStream™ LED technology to deliver exceptional performance and superior energy savings. SkyRidge's advanced engineered LED system with superior optical design delivers an unparalleled combination of optimal light uniformity and exceptional efficiency for greater energy savings.

SkyRidge is compatible with all of today's popular ceiling systems and available in a variety of configurations for application versatility. Its perfect balance of form and function make it an ideal choice for commercial office spaces, schools, hospitals, retail and other indoor ambient applications.

## SPECIFICATION FEATURES

### Construction

Shallow 4.75" deep housing is extruded aluminum frame and injected molded composite end plates. End plates are securely attached with screws for strength and rigidity and the elimination of gaps. End plates have accessory grid-lock feature for safety and convenience. Four auxiliary fixture end suspension points are provided. Large access plate for supply connection.

### Controls

The SkyRidge LED is Powered by Fifth Light, with a standard 0-10V continuous dimming driver that works with any 0-10V control/dimmer. Combine with energy saving products like occupancy sensors, daylighting controls and lighting relay panels to maximize energy savings. In addition, the SkyRidge can include a factory-installed integrated sensor system for occupancy and daylight dimming control and manual control from an optional handheld remote. Or, specify the Digital Addressable Lighting Interface (DALI) drivers, dimmable down to 1% with the HD option, for use with Fifth Light controls. See ordering information for details on all three options.

### Electrical

Long-life LED system coupled with electrical driver to deliver optimal performance. LED's available in 3000K, 3500K, 4000K or 5000K with a typical CRI ≥ 85. Projected life is 60,000 hours at 84% lumen output. Electronic drivers are available for 120-277V applications.

### Emergency Battery Pack Option

Optional 120v-277v integral emergency battery pack is available in 7-watts or 14-watts to meet critical life-safety lighting requirements. The 90-minute batteries provide constant power to the LED system, ensuring code-compliance. A test switch/indicator button can be tested safely from the ground using a laser pointer, while the patented EZ Key prevents accidental discharge of the battery during construction. See ordering information for details.

### Driver Access

Drivers can be accessed via plenum.

### Finish

Durable frame has high reflectance baked matte white enamel finish for luminous uniformity.

### Optics

Precision formed optical assembly with positively retained high optical grade acrylic lens provides a directed optical distribution using WaveStream LED technology.

### SkyTrim Accessory

Designed for an array of interior applications, SkyTrim is a luminous decorative accent that can be mounted directly on the light guide of a SkyRidge fixture either at the factory or in the field. It is ideal for spaces where color is necessary to provide visual cues, emphasize brand identity, directional awareness or simply as an artistic expression.

### Compliance

Components are UL recognized. Indoor luminaires are cULus listed for 25° C ambient environments, RoHS compliant, and comply with IESNA LM-79. LEDs comply with LM-80 standards. DesignLights Consortium® Qualified. Refer to [www.designlights.org](http://www.designlights.org) Qualified Products List under Family Models for details.

### Warranty

Five year warranty.

NOTES: <sup>(1)</sup> Products also available in non-US voltages and frequencies for international markets. <sup>(2)</sup> With integral test switch/indicator/laser test. For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack (100 lm/W x 7=700 lumens). IES-format photometry for luminaire under emergency operation available. <sup>(3)</sup> Must be used in conjunction with a DALI control system. For complete DALI solutions by Fifth Light, visit [www.coopercontrol.com](http://www.coopercontrol.com). <sup>(4)</sup> Made-to-order (MTO) requires four week lead time. <sup>(5)</sup> 2900 lumen option is not available with Step-Dim. <sup>(6)</sup> Chicago rated version does not allow for row mounting. <sup>(7)</sup> Air version is vented but does not meet air handling requirements. Air version is non-IC. Air version is not available with integrated sensor. <sup>(8)</sup> DesignLights Consortium™ Qualified and classified for DLC Standard (all lumen packages). Refer to [www.designlights.org](http://www.designlights.org) for details. <sup>(9)</sup> Fixtures using factory installed SkyTrim option are not DLC qualified. <sup>(10)</sup> Custom color must list Roscolux numeric color specification code. <sup>(11)</sup> 2900, 3400, 5900 and 6400 lumen packages are not available with Step-Dim driver. <sup>(12)</sup> 5LTD option is not available in 2900 and 3400 lumen packages. <sup>(13)</sup> 5LTHD not available in 4800, 5300, 5900 and 6400 lumen packages. <sup>(14)</sup> Integral sensor works only with "CD" driver and is factory prewired to the driver for stand-alone control. <sup>(15)</sup> Flex does not include dimming leads. Control leads provided by others. <sup>(16)</sup> HCD driver option is not available with 6400 lumen package. <sup>(17)</sup> Used to transfer fixture to secondary power source for life-safety operation. When used with a dimming fixture, two devices are required to ensure control is disabled while operating under emergency power.

## INTEGRATED SENSOR

### Description

This innovative luminaire-integrated sensor control system is optimized for code-compliant occupancy detection and daylight harvesting – all from within the foot print of Metalux's award-winning recessed ambient luminaires.

### No New Wires

An in-place fixture retrofit is all that's needed to meet most energy codes in commercial spaces. The sensor system is factory wired to the luminaire, switching on or off based on occupancy, and dimming the light when enough daylight is available.

### Sophisticated lighting control without commissioning

The luminaire-integrated sensor system offers out-of-the-box operation using thoughtful default settings.

### Flexibility and Individual Control

When the application demands more, the sensor system has the option to make changes using a remote control. The remote allows changes from the default settings for occupancy, target light level, preset lighting levels, and more.

### Cost-effective, Stand-alone Operation

With a single product to mount and a single electrical connection to make, the Metalux luminaire with an integrated sensor system saves money on the total installed cost when occupancy or daylight harvesting controls are needed. The integrated sensor system works stand-alone, without the need for additional switches and dimmers. When manual-on, manual dimming or other code-required control schemes are needed, please see the comprehensive offering of Greengate and Fifth Light solutions from Cooper Controls at [www.coopercontrol.com](http://www.coopercontrol.com).

### Metalux Integrated Sensor Sequence of Operation

The occupancy sensing portion of the sensor uses Passive Infrared (PIR) technology with Auto-on/Auto-off operation. The small lens in the center of the sensor directs the view of a passive infrared occupancy detector to sense occupants moving through the room. To trigger the light on, an occupant must cross at least two passive infrared beams. When motion in the coverage area ceases, the sensor logic concludes the room is unoccupied, and begins a count-down timer. By default, the timer is factory-set to 20 minutes, and can be adjusted to 5, 10, 15 and 20 minutes using the optional remote control, model number HHPRG-MS. Any motion detected during the count-down timer will cause the light to remain on and resets the timer. When motion is detected, a red LED will blink. In addition to the default on/off functionality, the sensor has an Energy Saver feature, where the light can be set to dim to a preset level after the sensor detects no occupancy for half of the count-down timer, when the timer is complete the lighting will change to the unoccupied setting. The Energy Saver feature works when the count-down timer is set to at least 15 minutes, and the preset level and feature are configured using the optional remote control. See the Sensor Programming Guide that comes with the HHPRG-MS remote for details on this feature. The sensitivity of the occupancy detection can be adjusted, using the HHPRG-MS remote. By default, the sensor operates at the full detection range shown on the coverage pattern diagram. Using the "LO" button on the HHPRG-MS remote, reduces the sensor detection range by 50%. Full coverage can be restored at any time by pressing the "HI" button on the remote. The red LED indicator will blink repeatedly to confirm any programming change.

The dimming daylight harvesting portion of the sensor uses a small photo sensor located next to the occupancy sensing lens. The sensor continuously measures the available light in the room, even when the fixture is turned off. This allows sensor to operate in one of three daylighting modes, where the artificial light from the paired Metalux luminaire can adjust the light based on the amount of ambient light from surrounding natural and artificial light sources. Since the sensor measures light from its luminaire along with other light sources, this sensor follows a closed-loop dimming daylight harvesting style. The first mode, Daytime, is active when the sensor detects light of at least 100 lux in the room. In Daytime mode, when the light is turned on after detecting occupancy, the sensor will begin balancing the luminaire light level relative to the total available light it measures. The default light balancing target in daytime mode is 500 lux. This level can be adjusted higher or lower using the optional HHPRG-MS remote, and pressing "SET" and then the "DO" (Daytime Occupied) button to store the new light level. Similarly, the Daytime Unoccupied, "DU" has a default of level of 0 lux, or off, but can be adjusted higher to prevent the lights from turning off completely when unoccupied. More details on this function are found in the Sensor Programming Guide for the HHPRG-MS remote.

The next two modes, Twilight and Nighttime, function in a similar way, allowing the artificial light to adjust to different levels based on the surroundings. While primarily for use in outdoor luminaires, these modes are available for use in areas with a wide range of natural light, including atriums, day lit stairwells, and rooms with large or continuous windows. The Twilight mode is active when the sensor detects 50-100 lux in the off position, and has a 300 lux default light balancing target. The Nighttime mode is active when the sensor detects less than 50 lux, and has a 250 lux default light balancing target. Like the Daytime mode, there are separate settings for Twilight Occupied ("TO"), Twilight Unoccupied ("TU"), Nighttime Occupied ("NO") and Nighttime Unoccupied ("NU") which can be adjusted and set using the optional HHPRG-MS remote.

In addition to programming the sensor, the optional HHPRG-MS remote can be used for personal control to adjust the lighting temporarily override the functions of the sensor temporarily. The remote has raise/lower buttons to adjust the light level for special tasks, as well as a power button to turn the lights on or off. Unless the SET button and another function is selected, any changes made using these buttons will revert to the programmed settings after the sensor has detected no occupancy for its programmed time out, and turned off the lighting. The next time the sensor detects occupancy, it will revert to its programmed settings for count-down timer and light balancing.

TYPE E  
OFFICE WALL WASH

4" LOW VOLTAGE - LED OPTIMIZED  
NEW CONSTRUCTION - TYPE IC  
(E-RHN4101TP)

**Applications:** For use in insulated ceilings and can be installed in direct contact with insulation

Catalog #	Ceiling Cut-Out	Plaster Frame	Input Voltage	Lamp (Ordered Separately)	Lamp Base	Transformer
E-RHN4101TP	4.375"	7.625"W X 12.25"L	120V	(1) 12V MR16, LED 10W Max	2-pin GU5.3	120V Magnetic

**Performance**

- 1-year limited warranty

**Construction & Materials**

- Integral thermal protector guards against misuse of insulation materials and improper lamping
- Junction Box is listed for eight (4in-4out) No. 12AWG (90°C) through-branch circuit conductors and has five 1/2", one 3/4" and four Romex® knockouts with true pry out slots
- Romex® knockouts include built in strain relief - no additional clamps required
- Pre-installed hanger bars allow housing to be positioned at any point within 24" joist span and include locking screw. Score lines provided for easy field shortening to accommodate 12" joist span
- Hanger bars can easily be field repositioned 90° on the plaster frame
- Hanger bars are designed to fit on to T-Bar spine for quick alignment and can be permanently secured without the need for additional clips
- LED lamps dimmable to 25% when using with a dimmer suitable for magnetic loads (see recommended list of leading edge dimmers)
- Housing adjusts for ceilings up to 1-3/8" thick
- 5-1/2" height allows for use in 2" x 6" joint construction

**Electrical**

- 10W maximum LED lamp wattage. Not for use with halogen lamps. Use with LED lamps only.
- 120V magnetic transformer steps line voltage down to lamp operating voltage

**Regulatory**

- UL listed for damp locations

**Trims**

- E-T4100WH - Pin Hole w/Baffle
  - E-T4216CL - Reflector
- E-T4316BK - Black Metal Baffle
  - E-T4316WH - White Metal Baffle
  - E-T4616WH - Gimbal
- E-T4801WH - Slotted Wall Wash w/Baffle
  - E-T4726WH - Eyeball w/Baffle

# LM16

## LED MR16 Lamp

### Product Description

The Cree LM16 delivers up to 620 lumens while achieving over 68 lumens per watt. The LM16 LED MR16 lamp is available in a variety of beam angles with a color temperature of 3000K. Designed to halogen MR16 lamp standards, the LM16 LED lamp imitates the size, appearance and lumen performance of halogen lamps. This lamp saves 80 percent of annual energy savings and is suitable for open track fixtures and non-IC rated downlights. It is capable of dimming down to 5 percent and is perfect for down lighting, track and accent lighting use in both commercial and retail applications.

### Performance Summary

**Delivered Light Output:** 464 lumens (35W eq); 620 lumens (50W eq)

**Input Power:** 7 watts (35W eq); 9 watts (50W eq)

**CRI:** 83

**CCT:** 3000K

**Beam Angle:** 17°, 25° and 40°

## 6" LED DOWNLIGHT NEW CONSTRUCTION - TYPE NON-IC (E-A6NL21-1T)

### Performance

- Estimated 25,000 hours of maintenance-free operation
- 3-year limited warranty

### Construction & Materials

- Heavy-gauge formed steel housing integral reflector mounting spring
- Snap-on Junction box cover plates
- Precisely formed non-imaging one-piece reflector design
- Thermally protected in accordance with Article 410 of NEC and UL 1598
- 1 1/4" deep aperture throat, to accommodate all standard ceilings
- Mounting brackets are adjustable from above or below the ceiling and have a 5" vertical adjustment
- Oversize, through branch circuit rated, Junction box
- Use 1/2" EMT for mounting or choice of optional C-Channel or flat hanger bars
- Heat dissipating aluminum extrusion
- Ten 1/2" and four 3/4" knockouts with pry-outs
- Eight knockouts with Romex cable clamp
- Cree® LEDs inside

### Electrical

- Non-dimmable
- Listed for eight #12AWG (4 in-4 out) 90°C feed through branch circuit conductors

### Regulatory

- UL, cUL Listed for damp locations
- UL, cUL Listed for installations where insulation can be kept 3 inches away

### Accessories

**30-inch C-Channel  
Hanger Bars (2)**  
CAT.# E-RABH30C

**27-inch Flat Bar

# Lumination™ LED Luminaires

## RX Series Downlights

Project name WTB  
 Date 2/11/16  
 Type CONF CENTER  
ENTRANCE

### Product Description:

The Lumination RX Series LED downlights are the ideal retrofit solution for traditional 1 or 2-lamp CFL downlights. They install in just minutes into most 6-inch and 8-inch CFL rough-in frames and bring a fresh look to the space. Unlike plug-in LED lamps, the RX downlight give you a new power supply and 50,000 hour life rating, so that you won't have to worry about compatibility or maintenance issues with the original ballasts. All downlights in the RX family have 120-277V input and a uniform lit appearance, delivering premium performance in an economical package.

### Targeted Performance Summary:

**Distribution Patterns:** Wide  
**Delivered Lumen Output:** 1000, 1500, 2000, 3000  
**System Input Power:** 14W, 19.5W, 25W, 36W  
**System Efficacy (LPW):** 71-83  
**Input Voltage:** 120-277V  
**Standard Dimming Controls:** Non-Dimming  
**CCT:** 3000K, 3500K & 4000K  
**CRI:** 82  
**Lifetime Rating:** L70 @ 50,000 hours  
**Input Frequency (Hz):** 60Hz  
**Power Factor:** >0.9  
**Mounting Options:** Spring clips clamp on to existing frame or directly to ceiling  
**Weight:** 0.6 lb  
**IC Rating:** Non-IC Rated  
**Limited Warranty:** 5 years system  
**Files Available:** LM79, LM80, IES

### Product Dimensions:

Listings:  • UL and cUL Listed.  
 • Suitable for damp locations.

## Product Specifications:

### Construction:

- 16 gauge Aluminum spinning reflector housing, powder coating
- Custom engineered heat sink flange for passive cooling on all lumen options

### Installation:

- Fixture mounting to an existing metal frame
- Conduit connect to quick-disconnect for easy installation

### Optical System:

- Custom engineered reflectors for wide distributions.
- Semi-diffuse diffuser for ideal combination of optical efficiency and uniformity

### Electrical System:

- High efficiency drivers, non-dimming

E-KXC215U7(*)	15W LED Beveled Cylinder - Residential Neutral White	120V	980	4000K	80	35,000 Hours	75W PAR30

(\*) Specify finish color. K=Black, W=White

<sup>1</sup> Calculated L<sub>70</sub> based on 6,048 hours of LM-80 testing; >36,000 hours

### Performance

- Estimated 35,000+ hours of maintenance-free operation
- 3-year limited warranty

### Construction & Materials

- Durable aluminum housing with white or black polyester powder-coat finish
- Polycarbonate adapter with copper conductor
- Spring latch secures light fixture to track
- Integral On/Off switch
- Pivot mount allows rotations up to 350° horizontally and 0-90° vertically in both directions for maximum aiming adjustability
- Supplied with 20° spot reflector and additional 40° diffuse lens for easy beam angle interchangeability. Diffuse lens changes lumen output to 950 lumens
- Compatible with 1- or 2-circuit track from E-conolight, Ruud Lighting, Juno, Prescolite, and Con-Tech
- Cree® LEDs inside

### Electrical

- Dimmable down to 10% (see next page for compatible dimmers)
- 120V operation

### Regulatory

- ETL Listed for dry locations

#### NOTE:

These track fixtures are ETL classified to be used with the following track systems:

- E-conolight: E-K1 and E-K2 Series
- Ruud Lighting: T1 and T2 Series
- Juno®: T and TU Series (not affiliated with E-conolight or Ruud)

Due to continuous product improvement, information in this document is subject to change. All published photometric testing performed to IESNA LM-79-08 standards by a NVLAP certified laboratory. Fixture photometry was completed on a single representative fixture. Actual production units may vary up to ±10% of initial delivered lumens. Lumen maintenance values at 25°C (77°F) are calculated per TM-21 based on LM-80 data and in-situ fixture testing.
